

Mespack e Famartec Partner per fornire una soluzione integrata all'industria farmaceutica

**La collaborazione risponde alle esigenze del settore farmaceutico, che richiede
sempre più soluzioni integrate.**

**La nuova macchina con sigillatura verticale di Mespack, sviluppata esclusivamente
per i prodotti farmaceutici, sarà integrata con l'astucciatrice automatica di
Famartec, al fine di produrre stick-pack e inserirli in astuccio.**

Il progetto sarà lanciato ed esposto presso lo stand Interpack di Mespack

Sala Bolognese (Italy), 14 Febbraio – Mespack e Famartec sono lieti di annunciare la loro collaborazione per lo sviluppo di una soluzione integrata di alta qualità per il settore farmaceutico; la soluzione integrerà confezionamento primario e secondario. La crescente richiesta da parte dei clienti farmaceutici di una soluzione completa per soddisfare le loro esigenze di produzione ha incoraggiato entrambe le principali aziende produttrici di macchinari a unire le forze per rispondere al mercato.

In riferimento a questa prima collaborazione, Mespack e Famartec presentano lo sviluppo di una soluzione completa per prodotti farmaceutici. Il progetto congiunto è costituito da una nuova macchina verticale form-fill-seal per la produzione di bustine stick-pack, integrate in un modulo di astucciamiento che raggruppa le bustine prima di inserirle in astuccio.

La linea è stata appositamente progettata per l'industria farmaceutica ed è conforme a normative specifiche, come GMP, GMP5, FDA e 21 CFR Part 11.

La linea potrà essere visionata presso lo stand Interpack di Mespack (B57-B73). La fiera Interpack è la fiera più rispettata e rilevante del settore del packaging. Si terrà dal 4 al 10 maggio a Düsseldorf (Germania).

About Mespack: www.mespack.com

Headquartered in Barcelona, Spain, Mespack is an international manufacturer of flexible packaging machinery, offering horizontal (roll-stock, pre-made, and hybrid), vertical form-fill-seal equipment for the production of to produce sachets, stick packs, film-based packaging (including stand-up pouches), water soluble pods, and end-of-line equipment (wrap around and American box). Mespack engineers and builds premium quality machinery for the world's leading consumer packaged goods companies. Recognized as a highly innovative brand, and strongly committed to developing machinery to produce sustainable packaging solutions, Mespack has the largest product portfolio of the industry. Founded in 1994, and with more than 2,200 machines in service worldwide, Mespack has a sales network in over 90 countries as well as regional service centers, which provide expedited access to parts and services. Mespack serves the food, beverage, pharmaceuticals, personal care, and pet food industries, among others. Mespack has more than 17.700m² divided into three manufacturing plants: one in Santa Perpètua de Mogoda (Barcelona, Spain), another in Vadodara (India), and a third one in Des Plaines (Chicago, USA). Furthermore, Mespack has commercial offices in France, China, Malaysia, Argentina, Brazil, Colombia, and Guatemala. It has recently opened Mespack Innovation Centre (MIC), a facility focused on developing innovative projects with the most state-of-the-art equipment that is prepared to test recyclable materials. Following the principles of open innovation, the company collaborates with key partners of the flexible packaging sector to co-create challenging and customized projects for its customers. Since 2015, Mespack has been part of Duravant, a global automation equipment company with a premium portfolio of products, services and integrated solutions.

About Famartec: www.famartecsrl.com

Located in Bologna (Italy), the well-known "Packaging Valley", as a leader packaging machines supplier for products in blisters and cartons, Famartec provides first class solutions to meet the high demands in terms of quality of pharmaceutical, cosmetic and nutraceutical industries. Innovation, as well as the continued focus on providing sustainable and efficient packaging solutions, led Famartec to play an important role on the world stage. In 54 years of operation, Famartec has sold more than 2000 machines worldwide. In 2015 the company joined the Curti Industries. For over 60 years, CURTI has been producing automatic machines and complex subassemblies for various industrial applications, thanks to its significant expertise in the mechanical engineering sector. The company's value offer is divided into several divisions, all geared towards research and innovation in highly specialised technical sectors. The presence of important companies in the CURTI Industries group has effectively contributed to the growth of the various activities, among them a branch office into the U.S.A. and a mechanical parts production unit in Poland. Today the products portfolio of Famartec, which includes blistering machines, thermoforming machines, horizontal intermittent and continuous motion cartoning machines and horizontal case packers, integrates with that of the Curti Packaging Unit, with vertical cartoning machines used in the pharmaceutical and food sectors, display box tray, vertical case packers with possibility of integration of palletising area and stand-alone palletising and de-palletising systems. Providing comprehensive and customised lines for primary and secondary packaging as well as a high capacity and flexibility to integrate machines into existing lines are the strengths of Famartec. Famartec represents nowadays an ideal partner, guaranteeing customers valuable returns on investments in addition to full assistance, consulting and customer care, starting with project management and final testing.
